THE SOLUTION FOR EFFICIENT,
INTEGRATED AND RESPONSIBLE
MANAGEMENT OF URBAN GREEN AREAS

PUBLIC ADMINISTRATIONS

The innovative and intelligent platform for trees and green area management, R3 TREES, individually fits the needs of a public administration and allows it to:

- Improve and document all activities concerning the management of green areas
- Minimize the risk of liability in case of incidents caused by trees and playground equipment
- Guarantee that the know-how and experience of co-workers will be preserved
- Show your achievements to the public and the administration
- Increase the satisfaction of your co-workers by adopting simple, modern and efficient technologies
- Sensitize and include the citizens in the management of green areas
- Save time in reporting and integrate green area data in other applications through open standards and documented interfaces
- Save resources by making decisions based on historical data

R3 GIS is a direct contact, interested in your ideas, your needs and your experience. Our customers help us constantly improve our software, so we can always support them in their work at our best.
